- Material: Aluminum.
- Cutting thickness: 10mm / 3.94in.
- Dimensions: Rotating handle length 8.5 cm, cutter holder length 9.5 cm, handle length 8.5 cm

### INSTRUCTIONS

1. When cutting glass, the blade should be close to the ruler; the handle cuts the glass at a 45-degree angle; when cutting straight, the pressure should not be too heavy or too light; about 20N is appropriate.
2. Make sure that the line you pass cannot be redrawn. Then use the center of the opener screw rod to align the back of the glass or tile with scratches; clamp the glass or tile; then slowly tighten the opener screw knob; you can open the film. success.
